

Standard Coupler

1. The standard coupler to be used on any equipment which will be operated on the Highland Pacific Railroad are Magnetic Automatic Couplers similar in design to Kadee brand couplers that meet the requirements of the Standards and Operations Division as shown on Attachment "A".
2. The Standards and Operations Division is granted authority to revise the list of approved couplers for use on the Railroad on an as needed basis whenever new coupler designs become available that meet the Standards and Operations Division approved design features.
3. Special operating portions of the layout and equipment which cannot interchange with standard HO scale equipment is exempt from the provisions of this Standing Rule.
